HYTONE CREAM
(Brand Name)

Generic Name: Hydrocortisone

Purpose: This medicine is used to relieve redness and swelling of your incision lines.

Usage: Do not use this medicine more often or for a longer time than directed. Apply the ointment to the incision lines once a day for three weeks or as directed by Dr. Beeson. Do not apply in the hairline, but only the skin in non-hair bearing areas. Do not get medicine in eyes. If you do, flush out with water.

Precautions: This medicine should not be used on many kinds of bacterial, virus, or fungus skin infections.

Possible Side Effects: No common side effects have been reported with proper use of this medicine. If you notice any unusual effect, contact Dr. Beeson.
