**ROGAINE**  
(Brand Name)

**Generic Name:** Minoxidil

**Purpose:** This medicine is used to stimulate hair growth in men and women with a certain type of baldness.

**Usage:** Shampoo your hair each morning before applying minoxidil. Make sure your hair and scalp are completely dry before applying the medicine. Apply the amount prescribed to the area of the scalp being treated, beginning in the center of the area. Wash hands immediately after application. Do not use a hair dryer to dry the scalp after you apply the solution. Doing so may make the solution less effective.

**Possible Side Effects:** Less common side effects, which may go away during treatment, include dry or flaking skin or reddened skin. If they continue or are bothersome, check with Dr. Beeson. If you notice other effects not listed above, contact Dr. Beeson.
