TIGAN
(Brand Name)

Generic Name: Trimethobenzamide

Purpose: This medicine is used to treat nausea and vomiting.

Usage: If the suppository is too soft to insert, chill it in the refrigerator for 30 minutes or run cold water over it before removing the foil. Remove the foil wrapper and moisten suppository with cold water. Lie down on your side and use your finger to push the suppository well up into rectum.

Precautions: This medicine will add to the effects of alcohol and other depressants (medicines that slow down the nervous system). Do not take any such depressants while you are using this medicine. This medicine may cause some people to become dizzy. Do not drive, use machines, or do jobs that require you to be alert while taking this medication.

Possible Side Effects: Side effects can include drowsiness and dryness of the mouth.
